

Troubleshooting Guide

Customer's name: _____

Order # : _____

Contact number: _____

1. Verify year (including prod date), make, model: _____

2. Verify sensor part number received: _____

3. What is the specific issue:

a. Is the TPMS light blinking then turns solid? (Sensor pairing issue)

b. Is the TPMS light from start? (Pressure issue)

4. Verify all tire pressures are at the specified OE pressure as stipulated on door placard.

5. How many new sensors were installed?

6. Have the sensors been scanned for functionality with a properly formatted TPMS service tool?

a. What are the results?

b. Are all sensors broadcasting a signal?

c. Are all pressure readings accurate with actual pressures and temperature?

d. Are all sensor ID's different? All sensor ID's **MUST** be different.

7. Old and any other sensors must be at least 100 feet away from the vehicle.

8. Are there any Bluetooth devices in the or near the vehicle? All must be removed or turned off while the vehicle learns the new ID's.
